R.D. Lawrence Begins Work At Dubois Elementary School

R. D. Lawrence Construction Company has begun work to upgrade the heating, ventilating and cooling system at Dubois School in Springfield under a project that is scheduled to be completed by mid-August.

The work includes installation of a more efficient heating and cooling system and waterproofing of the school's foundation. The total cost of the project is \$1.987 million.

"R.D. Lawrence Construction welcomes projects like this upgrade at Dubois Elementary School because they allow us to stay connected with our history," said John Goetz, president of R.D. Lawrence Construction Company. "Dubois School is an historic building in our home community, and we are pleased to have the opportunity to perform renovations that will enhance its use for many years to come."

Services provided by R.D. Lawrence as a part of this project include demolition, concrete work, excavation and supervision. Other current R.D. Lawrence Construction Company projects include the expansion at Passavant Hospital in Jacksonville and the construction of the new public high school in Beardstown.
